

Partisep™ - ES Industries has developed a series of chemistries to closely match the performance of GE Whatman Partisil® columns. Partisep materials are available in both the standard 10 micron particle size as well as a 5 micron particle size for both shorter run times and higher efficiencies. Most methodologies on Partisil HPLC columns can be transferred to Partisep products without modification, including USP applications. The following Partisep phases are available:

- Partisep ODS
- Partisep ODS2
- Partisep ODS3
- Partisep C8
- Partisep Silica
- Partisep PAC
- Partisep SAX
- Partisep SCX

Below are a few part number examples for other lengths, ID's and phases click here http://esind.com/pages/products/products_08_11.tpl

Partisep™ ODS 5u 85A				
	4.6mm (ID)	4.0mm (ID)	3.2mm (ID)	2.1mm (ID)
5cm	115271-PSP-ODS	114271-PSP-ODS	11d271-PSP-ODS	112271-PSP-ODS
